Product Catalog

1. Small Water Heating Parking Heater – Schematic

Product Catalog

1-1 Small Water Heating Parking Heater – 【Brushed Motor】

No.	Part	Technical Parameters
1	Rated Voltage	12V/24V (Can Be Customized)
2	Power	5KW (Can Be Customized)
3	Fuel Consumption	About 0.38L/Hour
4	Ambient Temperature	-40°~80°
5	Product Weight	About 2.12KG
6	Size	About 22CM x 9CM x 17.5CM
7	Fuel Usage	Gasoline/Diesel/Methanol

Product Catalog

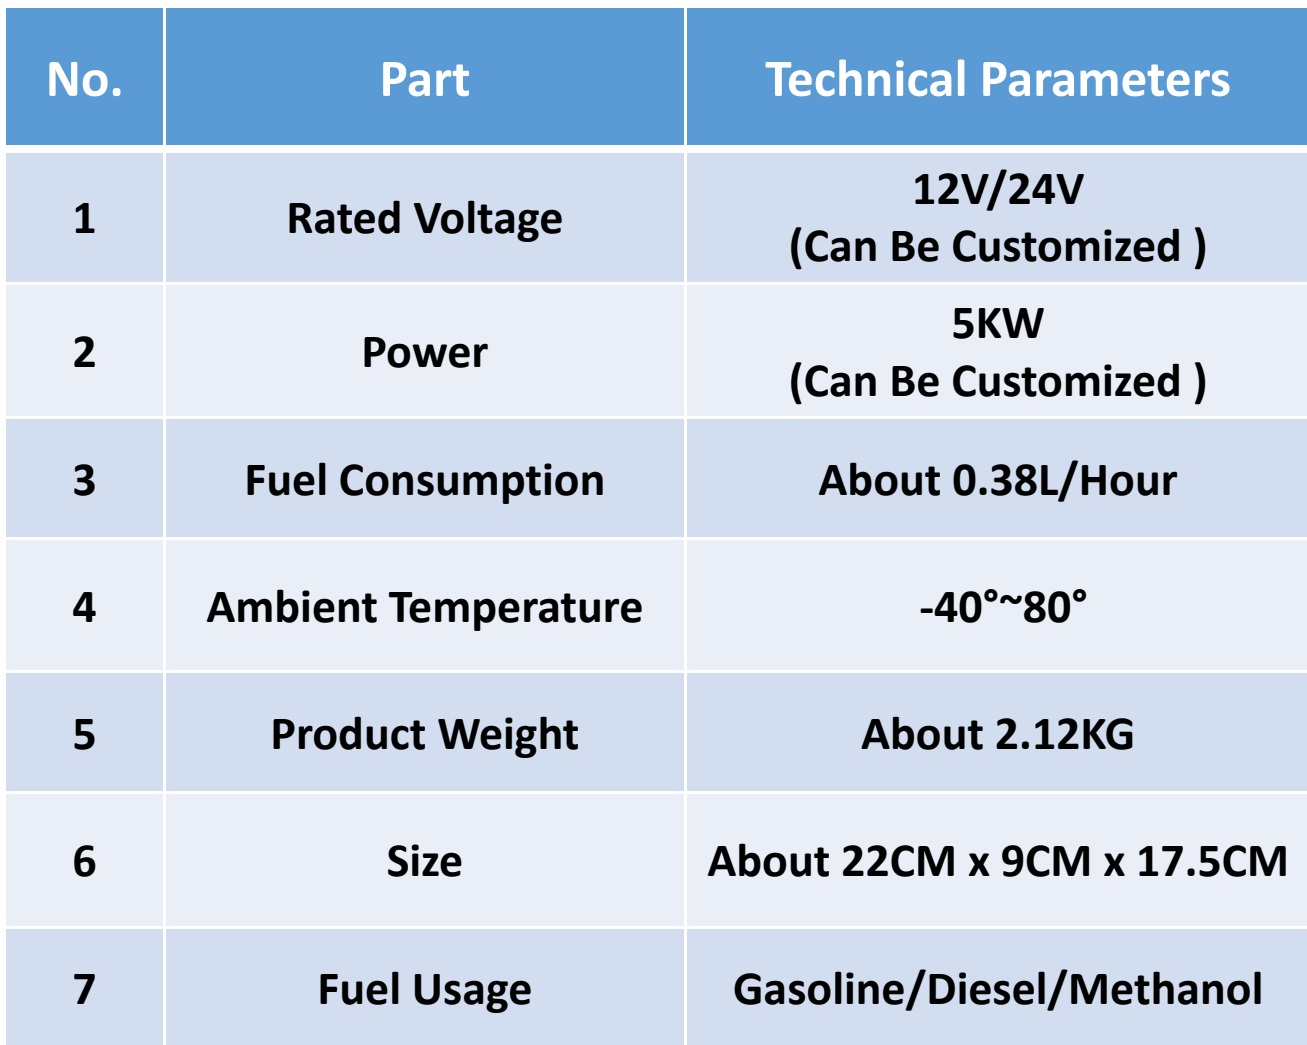

1-1 Small Water Heating Parking Heater – 【Brushed Motor】

- ➡ **Low Cost And Simple Structure**
- ➡ **Large Starting Torque And Strong Load Capacity**
- ➡ **Short Lifespan, Low Life Expectancy**

1-2 Small Water Heating Parking Heater - 【Brushless Motor】

Product Catalog

1-2 Small Water Heating Parking Heater – 【Brushless Motor】

➡ **High Price And Complex Structure**

➡ **Long Life, High Efficiency, Low Energy Consumption**

➡ **Low Noise, Good Heat Dissipation, Anti-interference**

2. Large Water Heating Parking Heater

Parking Heater 15 Years

High Power

High Efficiency

The advertisement features a central image of the Steel Star parking heater unit, which is a black cylindrical device with a label and various ports. Below the unit are two coiled hoses, one red and one black, and a small electronic control module with wires. The background is a composite of two winter scenes: on the left, a white and yellow bus is parked in the snow; on the right, a red semi-truck is driving on a snowy road. The Steel Star logo and website are also visible in the center of the image.

3-1 Air Parking Heater – Overall Style

No.	Part	Technical Parameters
1	Rated Voltage	12V/24V/220V (Can Be Customized)
2	Power	5KW (Can Be Customized)
3	Fuel Consumption	About 0.23-0.51 L/Hour
4	Ambient Temperature	-40°~80°
5	Product Weight	About 7.7KG
6	Size	About 42CM x 32CM x 25CM
7	Fuel Usage	Diesel
